

	CHAPTER - 8	
8	CODE OF ETHICS TO CHECK MALPRACTICES AND PLAGIARISM IN RESEARCH	
	<i>Framed and implemented w.e.f. 01.01.2018, Latest update w.e.f. 01.06.2025</i>	
8.1	Academic Freedom, Integrity and Responsibility	
	Academic freedom is the freedom to teach, study and pursue knowledge and research without unreasonable interference or restriction from law, institutional regulations. Its basic elements include the freedom of scholars to inquire into any subject that evokes intellectual concern, to present their findings, to publish data and conclusions without control or censorship, and to teach in the manner they consider professionally appropriate.	
	1. Academic integrity requires that academic research follow elevated professional standards, including appropriate research design and frameworks, adhere to high levels of research ethics and abide by the requirements set out by professional and regulatory research guidance and research ethics frameworks issued in appropriate areas by the regulatory bodies like UGC, AICTE, Anna University and others. 2. Academic integrity is defined in terms of the commitment to the values of honesty, trust, fairness, respect, responsibility, legality and dissemination.	
	1	Honesty: An academic community should advance the quest for truth, knowledge, scholarship and understanding by requiring intellectual and personal honesty in learning, teaching and research.
	2	Trust: An academic community should foster a climate of mutual trust to encourage the free exchange of ideas and enable all to reach their highest potential.
	3	Fairness: An academic community should seek to ensure fairness in institutional standards, practices and procedures as well as fairness in interactions between members of the community.
	4	Respect: An academic community should promote mutual respect among students, staff, and faculty, respecting themselves, others, scholarship and research, the educational process, and intellectual heritage, without any discrimination based on gender, caste, race, or religion.
	5	Responsibility: An academic community should uphold high standards of conduct in learning, teaching and research by requiring shared responsibility for promoting academic integrity among all members of the community.

	6	Legality: An academic community should observe valid legal norms related to the conduct and publication of research, particularly in relation to copyright, the intellectual property rights of third parties, the terms and conditions regulating access to research resources and the laws of the state and country.
	7	Communication: An academic community should seek to make the results of its research as widely and as freely available as possible.
8.2	Institutional Responsibilities	
	The College Governing Council, Principal, Heads of Departments, Research Supervisors, Librarian, together with the faculty members, are responsible for promoting and endorsing a transparent academic environment conducive to the application of the high professional and ethical practice for academic research.	
	The Heads of Departments and Professors are expected to create and sustain a climate of mutual co-operation that facilitates the open exchange of ideas and the development of academics and research skills. They are also expected to ensure the provision of appropriate supervision and direction for researchers, by the nature of the individual academic discipline and associated mode of research. The Knowledge Institute of Technology (KIOT) is committed to the provision of appropriate direction of research and supervision for researchers. Supervisors are expected to adhere to the Code of Practice for Doctoral Supervision of the affiliating university, which delineates the supervisory relationship, the assessment of research progress, and the procedures to resolve problems in the supervisory relationship.	
8.3	Training	
	The Academic Departments should ensure that all researchers undertake appropriate training in research design, methodology, regulatory equipment use, confidentiality, data management, record keeping, data protection and publication, the appropriate use of licensed research resources and respect for the intellectual property rights of third parties. The Institute is also committed to preparing its administrative and support staff involved in record keeping and expects them to fully respect the principles and rules of the Code of Ethics in Academic Research.	
8.4	Publication Practice and Authorship, Notification, Archiving and Depositing Copies of Research Publications with the Institutional Repository (IR)	

	KIOT encourages the publication and dissemination of results of high quality research. It also expects that researchers will engage in the process of publishing and dissemination of their work responsibly and with an awareness of the consequences of any such dissemination in the wider media. Results should be published in a form appropriate to the academic discipline. The Institute requires that all individuals listed as authors accept responsibility for the contents of their publication and can identify their contribution to it. Authors should have participated sufficiently in the research to take public responsibility for the content. The Anna University has given access to plagiarism check software "Turnitin " for its Recognized Research Supervisors. All the Ph.D. thesis and research articles related to the Ph.D. degree are checked for Plagiarism at https://www.urkund.com/ and then processed for degree.
