

	CHAPTER – 27	
27	WASTE MANAGEMENT POLICY (w.e.f. 01.06.2025)	
	<i>Framed and implemented w.e.f. 01.01.2018, Latest update w.e.f. 01.06.2025</i>	
	KIOT is committed to environmental sustainability and follows a comprehensive waste management policy for the effective handling of solid, liquid, and e-wastes, as well as for reducing carbon footprint. As an Autonomous Institution, KIOT aligns its waste management practices with institutional policies, statutory guidelines, and best practices recommended by regulatory bodies such as AICTE, UGC.	
27.1	Solid Waste Management	
	• Solid waste such as metal scraps and paper waste is collected at designated points and sold to authorized vendors every six months or as required, following due documentation. • Food and vegetable waste from hostels and the canteen is collected and provided to local farmers for cattle feed. • Organic debris is composted in the campus composting yard and used as manure for trees, shrubs, and gardens. • The campus is declared a plastic-free zone; any minimal plastic waste generated is collected and sold to authorized recyclers. • Old and unserviceable batteries are disposed of through authorized vendors in compliance with hazardous waste disposal regulations.	
27.2	Liquid Waste Management	
	• The college operates a Sewage Treatment Plant (STP) with a capacity of 45,000 liters/day to treat wastewater. An additional STPs will be installed as required. • Treated water is reused for landscaping and greenery maintenance through drip irrigation systems. • Diluted chemicals and solutions from Environmental and Chemistry laboratories are safely disposed of through continuous-flow sinks, ensuring compliance with laboratory safety protocols.	
	• Waste lubricant oils are collected and sold to authorized recyclers in compliance with environmental regulations.	
27.3	Carbon foot print reduction	
	• To minimize CO₂ emissions, faculty, staff, and students are encouraged to use public transportation or KIOT's dedicated bus service.	

		• The college operates 36 buses covering a 75 km radius daily, benefiting around 2,000 students and staff, thereby reducing individual vehicle use.	
		• Awareness programs on sustainable commuting and energy conservation are periodically conducted.	
27.4	E-waste Management		
		All e-waste generated, including obsolete electronic equipment, is inventoried and sold to authorized recyclers in compliance with e-waste management rules. Functional but surplus equipment is donated to schools, NGOs, or community centers to extend the product lifecycle before disposal.	
27.5		Monitoring and Compliance (<i>Autonomy-specific addition</i>)	
		• Annual environmental audit reports, including waste management metrics, are presented to the Governing Body and disclosed in the college's Annual Report and website. • Waste management initiatives are integrated into the Institutional Development Plan to meet the objectives of Sustainable Development Goals (SDGs), particularly Goal 12 (Responsible Consumption and Production) and Goal 13 (Climate Action).
